RxJS	HTML
Redux	Bootstrap 4

**Agile \* GIT \* Linux \* Apache**

## Work Experience

May 17' - Present

**Menards Inc.**

Point of Sale - Full Stack  
Developer

### FRONTEND

- Building Angular applications that Employees use to manage store operations
- Sharing a library of components and services across many departments for all developers
- Integrating several APIs while using Redux to manage application state

### BACKEND

- Document, implement, and test micro REST services using Java Spring Boot
- Analyze data using Splunk to gain better insight on how our services were being used

## Personal Projects

### iXplore

- Web application that allows people to login via social media, pin a location on a map, and save travel photos
- Built with Angular, Node.js, MongoDB, AWS S3, and Google APIs

### Party.sh

- Bash script that randomly selects people and chooses a random activity. Using the Mac 'Say' command the script speaks through the speakers
- Built with Bash commands sed, grep, and cat

### On The House

- Location based raffles held inside bars
- Built with Swift, Java, MySQL, cron jobs

## Interests

Currently I live in Wisconsin but my heart is drawn to Colorado. I love being outside and exploring the mountains.
