EXPERIENCE

May '17 - Present

Menards Inc.

POS-Intern Integration Team
Java programmer

- Cooperate on the back-end team to modify, implement, and maintain REST/SOAP services
- Analyze data using Splunk to gain better insight on how our services are being used
- Make daily use of several Atlassian software products to manage projects and to communicate efficiently with team members
- Utilize frameworks Angular and Spring to develop the front and back-end of an in-house utility
- Created a utility that gave teams members the ability to create needed documents and search store details more efficiently and user-friendly

June '16 - August '16

Michael Angelo's

Summer Intern

- Created a user-friendly interface to access data, which allowed parts to be found easily during reorganization
- Aided mechanics in the process of efficiently finding the necessary parts for a machine
- Reduced machine down time, saving the company time, frustration, and money
- Trained others on the use of this program

Research

September '18 - Present

Eau Claire

Research Member

- Help professors meet students' needs as quickly and efficiently as possible
- Construct the front and back-end for classroom monitors that present class information and students' needs
- Collaborate with a team of three to brainstorm, build, and merge features into the project
